a
Late Ising advantage (session):
odd and even reaches agree
2021 sessions
2022 sessions
even reaches
odd reaches
b
Late increase is in the
2022 cohort
simultaneous
200-ms lagged
late − baseline gain (nats/bin)
2021 sessions
(n=15)
2022 sessions
(n=6)
c
Letting J change late does
not improve prediction
held-out gain from
late-specific couplings
